

A C Petfoods (2007) Ltd

2017 Bobby Calf Collection

Welcome to AC Petfoods Calf Collection Service. We look forward to working with you this season.

We require the following forms to be completed once to cover your farm for the year.

- Supplier declaration form
- Payment details form

Calf payments are made by the 10th of the month for the previous month's collection.

Calves DO NOT require any TAGS (Including NAIT Tags)

Please ensure the following conditions are met so there is no delay in collection:

- Calves must have dry and withered naval.
- Calves hooves must be firm and worn flat – not rounded with unworn, soft tissue
- Calves must be strong enough for transport (at least 4 days old).
- Calves must be fed before pick up and stomach must not be concave (sunken).
- Collection will be any time from 7:30am onwards
- For casual collection requests, all calves must be phoned in by 1pm Calf pen must be clearly marked (We will give you a sign for the pen on your first pick up). Any calves not intended for AC Petfoods must be removed from collection pen.
- The pen must be easily accessible for the driver and their vehicle
- **We will collect calves within meat withholding periods, (including penicillin milk). Any calf sent within the meat withholding period or that has had animal treatment must be spray painted with a dot on its head. This does not effect your payment or collection.**

Please refer to our website for pricing. www.acpetfoods.co.nz/calves

Note: We try to avoid price schedule changes, however, if a change does occur throughout the season, it will take place on the 1st day of the month and will be communicated via our website.

Have a great season

James and Anna Hicks

AC Petfoods (2007) Ltd

Bobby Calf (Direct to Slaughter) Status Declaration 2017

Dairy Number:		Farm Name:	
Contact Name:		Contact Phone:	
Pick up address:			

I will ensure that all animal welfare requirements are met. All calves must:

- be at least four days old and not more than two months of age,
- be fit for transport, able to stand on all four legs, able to rise from a lying position and be freely able to move around,
- have no visible sign of disease, including scouring, any deformity, injury, blindness or other disability,
- the eyes shall be bright not dull or shrunken,
- have firm flat hooves, not rounded with unworn or soft tissue,
- have a dry, withered navel, not pink/red, raw or fleshy,
- Be fed at least half of their daily ration on the morning of uplift. The stomach must not be concave (sunken).

I acknowledge that if calves do not meet these requirements they will not be collected.

I will ensure that all animals are either:

- Not within any withholding period of any animal remedy of treatment administered to the calf (see note 1) or given to the dam before the birth of the calf (see note 2) or given to any cow that has supplied milk to that calf (see Note 3)

Or:

- If the calf is within withholding period for any animal treatment or remedy they will be clearly identified by a spray dot on the head of the affected calf.

Note: Calves born to cows treated with Buparvaquone for Theileria are not eligible for slaughter of petfood.

I will ensure that all calves have not been fed any ruminant protein as defined by the Biosecurity (Ruminant Protein) Regulations 1999. (see Note 4)

I undertake to ensure that all who work with these animals are instructed on the need to comply with these requirements.

If I become aware of any calf that has been inadvertently sent for slaughter not meeting any of these conditions, I shall immediately inform AC Petfoods (2007) Ltd.

Declaration:

I declare that, as a supplier of calves for petfood, this Bobby Calf (Direct to Slaughter) Declaration is true and accurate and that I have read, understood and agree that I must abide by the requirements set out on this form. Unless I advise AC Petfoods (2007) Ltd of any change prior, this declaration remains valid until 31 December 2017.

Signature (see Note 5): _____

Date: _____

Note 1: This includes calves treated with any antimicrobial agent (eg antibiotic or sulpha drug). Treatment with an approved electrolyte labelling to indicate there is no withholding period is permitted.

Note 2: Where a pregnant cow has been treated with any animal remedy, the calf's withholding period is the same as the cow

Note 3: Calves may be indirectly exposed to chemical residues if they are fed milk from a treated cow. The calf's withholding period is the same as the meat withholding period of the cow providing milk.

Note 4: The Biosecurity (Ruminant Protein) Regulations 1999 make it an offence to feed any ruminant with ruminant protein. Any calf that has been fed ruminant protein (eg a supplement containing meat & bone meal) is not eligible for use as petfood.

Note 5: The person signing this form must be the person with specific responsibility for the calves.
